MEDIA ALERT

**UPDATE ON CONSTRUCTION PROGRESS AT  
LUTHER FOREST TECHNOLOGY CAMPUS**

*(Saratoga Springs, NY)* – Luther Forest Technology Campus management is pleased by the federal government’s decision to approve a deal between Advanced Micro Devices Inc. and the Emirate of Abu Dhabi that will bring a \$4.6 billion computer chip factory to the campus, located in Malta, New York.

The Committee on Foreign Investment in the United States determined that the deal does not create a national security concern. The committee informed AMD of its decision in a letter dated Monday.

The semiconductor fabrication plant, also called a “fab,” will be the first major tenant of Luther Forest Technology Campus.

“The decision by the federal government to clear the way for the AMD-Abu Dhabi deal is very welcomed news and was the next critical step to progress on the fab,” said Michael Relyea, president of Luther Forest Technology Campus. “The next phase of preparation for construction will begin in 2009 with the groundbreaking for the factory.”

The next step will be the sale of the LFTC land to The Foundry Co., the spin-off company created by the AMD-Abu Dhabi deal. Infrastructure progress is underway and the official groundbreaking for the fab is expected to happen as early as March or April.

For further information or to set up an interview with Michael Relyea, please contact Nicole Messier at 415.912.7595 or at [nicole@shoreypr.com](mailto:nicole@shoreypr.com).
